

ROW TYPE DISTRIBUTION BOARDS

MIDDLE EAST
Switchgear
IND. LTD.

Product Description

The new generation of sheet steel Distribution Boards care for safety and reliability in the electrical installation. These are suitable for flush/surface mounting and provide the ideal solution for installation as distribution boards in villas, flats, commercial buildings, offices, hospitals, etc.

MES Distribution Boards conform to DIN 43871 and IEC 439 standards.

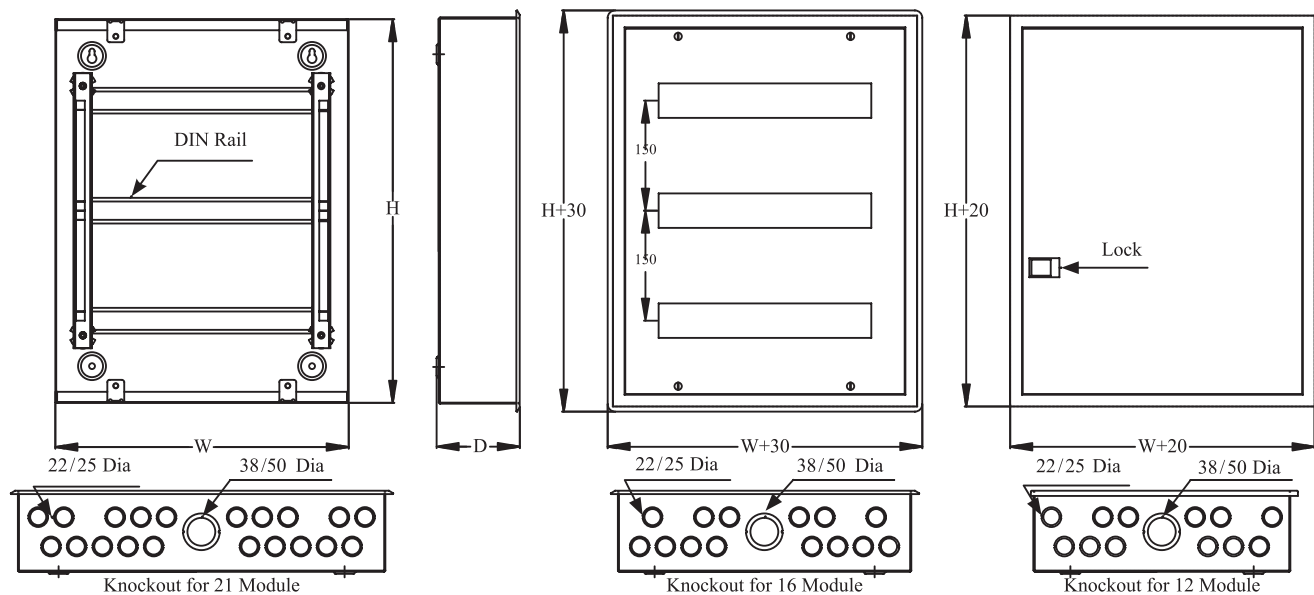

The enclosures are fabricated from high quality steel of thickness 1.2/1.5mm. The surface is pretreated with Zinc Phosphate and protected both externally and internally with textured polyester powder coating RAL-7035 (MES can also supply in any other RAL colour for volume orders).

Three versions are now available offering 1 to 6 Rows with 12, 16 and 21 modules (18mm).

The design of the enclosure is such that all the components can be easily removed at the time of installation.

Main Features:

- Easy to install, has ample wiring space
- Built-in symmetrical DIN 35mm support with variable depth facility
- Connection using supply busbar prong type
- Door is flush with the cover
- Both surface and flush type
- IP41 protection class
- Easy removable door
- Can be equipped with glass door
- Can be fitted with key operated lock
- Blanking plate available for space covering
- Different sizes of Neutral and Earth Terminals available
- Top and bottom of the box provided with knockouts (20/25mm for outgoing cables; 38/50mm knockouts for incoming cable)
